Professional Summary

I am a very detail oriented front end web developer. I graduated from the Iron Yard's highly intensive 12 week front end engineering program on August 5th. I am ready to join a team with good senior leadership and room for growth, where I feel like I can be a real asset while also learning every day.

I am making a career change from accounting to web development, which means that I will have a unique view on application development as it relates to profitability and cost versus benefit of designing applications.

Skills

- Front End Web Developer
- Object-oriented design & development
- API design knowledge
- Javascript
- HTML and XML
- Web-based software engineering
